

(a) Fleet composition
 Spawn ring — 16 vessels, 6 receive-only

Recomputed directly from Fig7 RawData (5 seeds: s42, s43, s44, s45, s46), sample-size weighted across the communicating and non-communicating groups.
 CAUTION: these values do not match the previously delivered Fig7 (compliance 51.4–52.3%, collision 1.08–2.60%). Provenance must be resolved before quantitative claims.
 Grey dots are individual seeds; the band is ± 1 s.d. across seeds.
