

(a) Fleet composition
 Spawn ring — 16 vessels, 6 receive-only

Same mute-TX (rx-only) sweep, isolated 64-env eval, 3 seeds.
 ON hub stays near Fig1 ON (~95%); OFF-trained stays near Fig1 OFF (~93%). Cutting transmitters does not erase the training-with-comm advantage, and neither curve collapses.
 Radar-only mute (hear nothing) did not separate from rx-only on this hub — omitted.
