

(a) Fleet composition
 Spawn ring — 16 vessels, 6 receive-only

v12mix ON hub only (not OFF policy). Mute-TX sweep, 3 seeds, isolated 64-env (Fig1 budget). $n_{rx}=0$ goal=95.3% · $n_{rx}=16$ =95.1%.
 Intended: $n_{rx}=0 \approx$ Fig1 ON; mid n_{rx} = sparse TX while others still hear; $n_{rx}=16$ = no transmitters (message ablation) — should not beat full TX.
 OFF-policy overlay removed (belongs in Fig1).
